SENSOR MAGAZIN

SENSORS · MEASURING TECHNOLOGY · AUTOMATION · MICRO-NANO INTEGRATION

www.sensormagazin.de

Magazin Verlag Hightech Publications KG
Wincklerstr. 4 · 31542 Bad Nenndorf, Germany

Brief profile

SENSOR MAGAZIN sees itself as a connecting link between science, practice and application. The journal provides information to engineers and scientists who develop, manufacture and use sensors and actuators. It serves as a link between sensor manufacturers and sensor users. The articles report on the application of sensors and actuators in all branches of industry, at institutes and in laboratories.

The current technological developments in the industry are the subject of each issue's Main Topic. The trade magazine focuses on practice-related articles in the fields of Sensors (Sensors for Geometric and Mechanical Parameters, Pressure Sensors, Magnetic Sensors, Sensors for Optical Sizes, Laser Sensors, Thermal Sensors, Chemical Sensors, Sensors for Acceleration, Vibration, Tilt, Orientation and many more) und their applicaion (Mechanical Engineering, Automation Technology, Industrial Engineering, Mobile Machinery, Robotics, 3D Printing, Safety Engineering, Traffic and Transport, Building Automation, Smart City, Environmental Engineering, E-Mobility, Medical Engineering, Food Technology, Household Appliances and more). Future trends are reflected under headings such as Research, Innovation, Micro-Nano-Integration as well as market and trade fair reports. Exclusive interviews with key people from research and industry round off the editorial spectrum. A list of supply sources (Topics) is contained in each issue of SENSOR MAGAZIN. All entries are additionally published on www.sensormagazin.de free of charge.

The contents, design and service meet the high requirements placed on a high-tech journal that is worth reading and promotes sales.

Managing Director

Karl-Heinz Schneider
